

Foreign Exchange Solution For Corporate Companies

Bespokefx has partnered with a leading FinTech company to develop the perfect solution for any company that is buying or selling currency. The Bespokefx team combines market-leading knowledge with expert practice in the international payments industry to offer a fully integrated platform.

The complete online foreign exchange suite is purpose-built to enable corporate companies to manage and track their currency exposure in a simple and cohesive manner. We found that the main issues businesses have when making a currency payment are the uncompetitive exchange rates and high transfer fees, access to only basic functionality of the platform along with no central point of contact when queries occur.

Key features of solution:

- Log-in via your internet browser
- No set-up cost
- Transparent exchange rates with no hidden fees
- Ability to monitor the status of your transactions
- Instant tracking of funds through direct integration with SWIFT (MT103)
- Capacity to transfer currency to one or multiple beneficiaries in one simple transaction
- Multi-tiered user permissions
- Authorisation of payments under the built-in 4-eyes principle
- Instant CSV file formatted reports that are compatible with most accounting software
- Notifications with key information and prompts
- Direct line to the Bespokefx Team
